

Special Session on Data Mining & Its Application (SoDA 2015)

Bangkok, Thailand.
22nd-25th Nov 2015

In conjunction with the 19th Asia Pacific Symposium on Intelligent and Evolutionary Systems (IES2015)

Data mining (DM) is often used by governments, companies, organizations or even individuals to gain insights into large amount of data that span different domains. To solve challenging domain problems and benefit from DM, different kinds of DM applications are developed. This special session provides a platform for researchers and application developers from data mining and its related areas to promote, present, discuss on-going research and contribute towards the advancement of data mining technologies.

Topics

Authors are invited to submit their original and unpublished articles in the domains as follows, but are not limited to:

- DM processes, applications and frameworks
- Unbalanced data and rare class problem
- Single/multiple classifier systems
- Cybersecurity, intrusion/fraud detection and prevention
- Internet applications and social networks
- Document analysis and content/information retrieval
- Business, finance and marketing
- Bioinformatics
- Data visualization and analytics
- Decision support
